Deployment / Silent Install of SoftMaker Office 2010

SoftMaker Office 2010 can be installed silently in just two steps:

- Unpack the MSI file from the SoftMaker setup program.
- Run a command line to install the MSI file.

Please read the following instructions carefully:

1. Copy the `ofw2010.exe` file to a local hard disk.

2. Open a command shell (CMD.EXE) in administrator mode. To do this in Windows 7, click on **Start**, type CMD.EXE, then right-click on the found executable in the Start menu and choose "Run as administrator".

Note: If you do not run this as administrator, installation of the MSI file will silently fail.

3. Run this command: `ofw2010.exe /ExtractCab`

4. Select any of the offered languages.

5. The file `SoftMaker Office 2010.msi` will now be created in the folder `SupportFiles`. Do *not* rename the `SoftMaker Office 2010.msi` file, or the installation will fail.

6. Switch to the folder `SupportFiles`.

7. Then run the `msiexec` program to install the MSI file.

A typical command line looks like this:

```
msiexec /i "SoftMaker Office 2010.msi" /qn TRANSFORMS=:lng_de.mst ALLUSERS=1
ADDLOCAL="ALL"
```

Here are the command-line command-line parameters that you can and/or should add:

- `/qn` initiates a silent install. If you wish to receive feedback during the installation, replace it with `/qb`.

- To install SoftMaker Office in a language other than English, add the `TRANSFORMS` parameter with the desired language:

Arabic	`TRANSFORMS=:lng_ar.mst`
German	`TRANSFORMS=:lng_de.mst`
Spanish	`TRANSFORMS=:lng_es.mst`
French	`TRANSFORMS=:lng_fr.mst`
Greek	`TRANSFORMS=:lng_gr.mst`
Hungarian	`TRANSFORMS=:lng_hu.mst`
Italian	`TRANSFORMS=:lng_it.mst`
Japanese	`TRANSFORMS=:lng_jp.mst`
Dutch	`TRANSFORMS=:lng_nl.mst`
Portuguese	`TRANSFORMS=:lng_pt.mst`
Russian	`TRANSFORMS=:lng_ru.mst`
Turkish	`TRANSFORMS=:lng_tr.mst`
Simplified Chinese	`TRANSFORMS=:lng_zh.mst`

- To do a full install, add this parameter:

  ```
  ADDLOCAL="ALL"
  ```

- During installation, icons for the SoftMaker Office applications will be created in the Windows Start menu. It is recommended to add the following parameter which creates these icons for *all users* of the computer:

  ```
  ALLUSERS=1
  ```

- For a custom install, add the `ADDLOCAL` parameter with a list of the program features that you wish to install. Possible parameters:

Install TextMaker	`FEATURE_TM`
Install PlanMaker	`FEATURE_PM`

ALLUSERS=1
```

If you do not wish to install one ore more of the main executables (TextMaker, PlanMaker, BasicMaker, Presentations, Smash), you must add a parameter that marks these as "to be left out":

- Do not install TextMaker: `INSTALLTM="0"`

- Do not install PlanMaker: `INSTALLTM="0"`

- Do not install SoftMaker Presentations: `INSTALLPR="0"`

- Do not install BasicMaker: `INSTALLBM="0"`

Example command line:

```
msiexec /i "SoftMaker Office 2010.msi" /qn TRANSFORMS=:lng_de.mst
ADDLOCAL="FEATURE_TM,FEATURE_PM,FEATURE_LANG_ENUS,FEATURE_SPELL_ENUK,FEATURE_SMASH"
INSTALLPR="0" INSTALLBM="0"
```

Tracing the installation

When you experience problems with the MSI installation, you should instruct it:

- to be verbose: In the command line, replace the `/qn` parameter with `/qb`

- to create a log file: Add the `/lv* Logfile.txt` parameter to the command line.

Example command line:

```
msiexec /i "SoftMaker Office 2010.msi" /qb TRANSFORMS=:lng_de.mst /lv* Logfile.txt
```

If you need to contact our support team because of installation problems, please *always* attach this log file to your e-mail.
